

ALBUM ALLEY

Coke Escovedo/Disco Fantasy/Mercury

This upbeat music has a Latin disco feel that's great for dancing. Coke is a friend and contributor to Santana's albums and concerts. On his own he makes rhythms that zap the stereo speakers with disco dazzle. His lyrics are nice and simple and the beat is irresistible. Slow songs like "Something Special" are super romantic.

James Talley/Blackjack Choir/Capitol

James Talley is a favorite of President Carter and his family. He even performed at the inauguration party. Talley's music is Southern and his lyrics show a love for the country and its working people. Each song is a well written story, crafted to stay in your mind and heart.

Klaatu/Capitol

Klaatu is a soft rock group that believes in U.F.O.'s and space travel. The trip they're on is a joyful one full of sweet harmonies and stereo tricks. They sound like mid-60s Beatles in a science fiction setting. They aren't heavy like Pink Floyd. What they do is a spacey Magical Mystery Tour that lifts your spirits.

Fleetwood Mac/Rumors/Warner Bros.

After all the awards Fleetwood Mac gathered recently they will have to make room for more. This new L.P. turned gold within four days of its release. Some of the music is gentle like "Dreams" and a few cuts, like "Go Your Own Way" are real spitfire rockers. Through all their musical changes Fleetwood Mac's persistent beat captures you.

An Evening With Diana Ross/Motown

The fabulous Diana Ross took to the stage last year and did a show that thrilled audiences. Her performance was recorded and made into a two record set that spans her career. She does all her Supreme hits, solo gold like "Love Hangover" and a medley from *Lady Sings The Blues*. Her talent and charm come through on all the songs.
