SWINGING SOUNDS

• BEST SINGLES

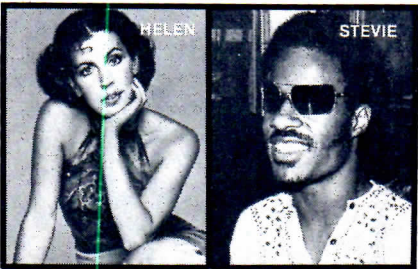

Helen Reddy: "CANDLE ON THE WATER." This is Helen's version of the theme song from Walt Disney's hit movie, "Pete's Dragon." It's a slow ballad and she does a beautiful job with it. Perfect for listening to while daydreaming, lounging, or on rainy days. Don't miss it!

Paul McCartney & Wings: "MULL OF KINTYRE." It's the #1 single in England, having sold over 1,200,000 records already! You may not be able to pronounce the name but don't let that stop you from buying it—it's dynamite! You wouldn't expect anything less from ex-Beatle Paul!

• BEST ALBUMS

Muppet Characters: "THE MUPPET SHOW." If you're crazy about all those "kookie" characters on the Muppet Show who sing, dance, tell jokes and just generally act silly, you're going to simply love this album! It's the #1 LP outside of the U.S. and everyone in your family regardless of age will really enjoy it!

Stevie Wonder: "LOOKING BACK." Here's a great opportunity to have some of Stevie's biggest hits like "I Was Made To Love Her" and "Heaven Help Us All" along with a couple of previously unreleased songs. It's a three-record set and covers his career from 1962 to 1971. It's a limited edition so if you're a Wonder fan, run don't walk to your nearest record store!

Average Disco Band: "MUSIC OF THE BEATLES GOES DISCO." There's no denying that the fast-beat, good to dance to disco sound is "in" now. So it's not surprising that some of the best old music would be updated and discoized. You can't get much better than old Beatle music so this album really has the best of both worlds—great songs done in a snappy disco style!

Original Motion Picture Score: "THE CHICKEN CHRONICLES." This movie was about life during the '60's so it's only fitting that the songs be from that time period. With songs such as "Traces," "Spooky" and "Stormy" by the Classics IV, "Buy For Me the Rain" by the Nitty Gritty Dirt Band and "Going Up the Country" by Canned Heat you have some of the best that era has to offer! •
